Authorization for this examiner's amendment was given in a telephone interview with John J. Dresch on May 19, 2006.

Claim 20 has been cancelled.

The following is an examiner's statement of reasons for allowance: After further review and consideration it was found that The combination of features in the independent claims 1 and 9 were not found in the prior art. The prior art comprises microcode units with embedded logic circuits dedicated to unique types of instructions and setting control signals required for executing the received instruction and instructions and microcode units comprising input for control variables and control signals for the instructions. However a microcode unit comprising a control signal input for receiving all the control signals output by the microcode unit for an immediately preceding instruction was not found in the prior art.
